Trigger-Lift Cantilever Umbrella (part #010611)

Assembly Instructions

Product ships with 2 - water-fillable bases.

Add-on weights are required for proper operation of umbrella!

Additional bases available for purchase (040TSBK).

Step 1

Remove all items from packaging.

Step 2

Assemble stand with included 4 bolts and wrench.
Position stand on level ground where umbrella is to be placed.

Step 3

Fill both included bases with water.
Position both bases on assembled stand.

Fill with water

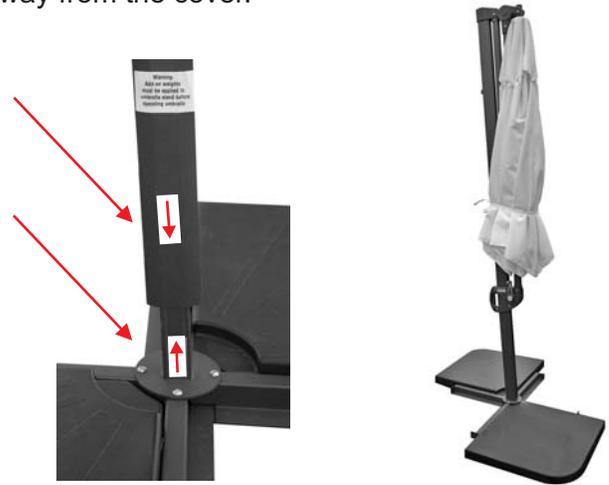

1

Assembly Instructions

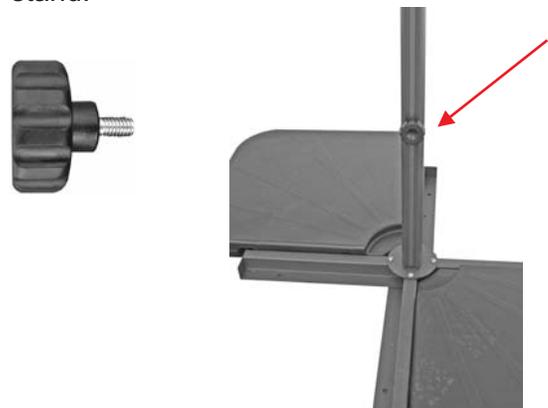

Step 4

Position main frame onto stand, insuring both arrows line up on the same side. The umbrella should lean back, away from the cover.

Step 5

Tighten thumbscrew to properly secure upper frame to base stand.

Umbrella is now ready for full operation.

2

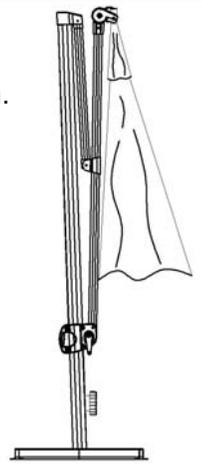

Operation Instructions

Step 6

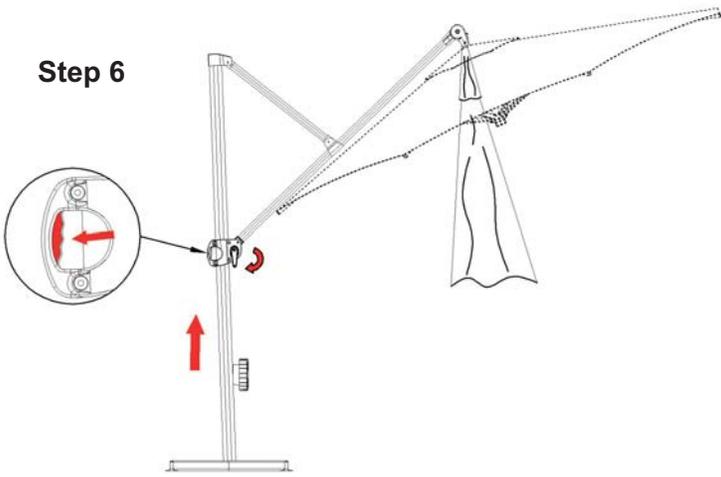

Squeeze the trigger handle to unlock, and push up to the 1st or 2nd position.

Crank the handle clockwise to open umbrella.

Warning: Do not crank handle in counter-clockwise direction!

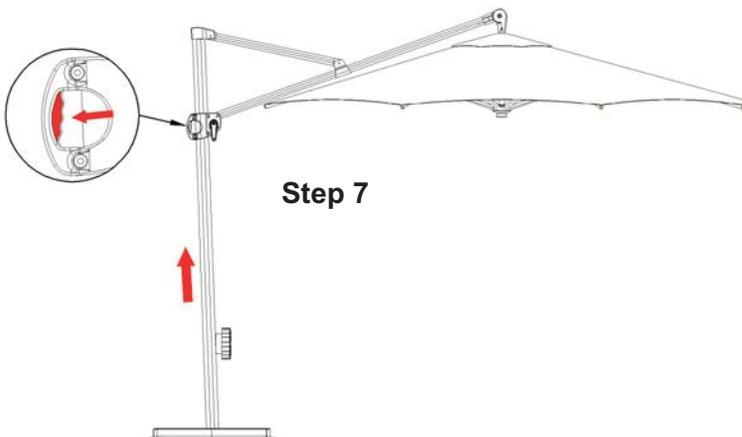

Step 6

Step 7

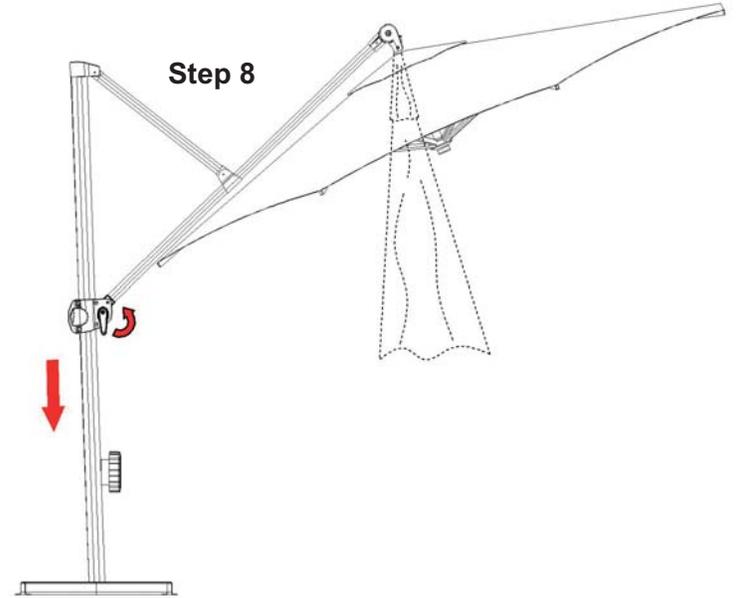

Once the umbrella is open, squeeze the trigger to push up to highest position. The fully opened position will have the canopy parallel to the ground.

Operation Instructions

Step 8

To close umbrella, squeeze the trigger to unlock, and pull down to 1st or 2nd position. Crank the handle counter-clockwise to close. Re-squeeze trigger to bring down to lowest position.

Note: During cold winter months, water may freeze inside of base. Insure water is emptied during cold periods or stored in a warmer environment.
